

Description

1Control QZero is a universal quartz remote control capable of copying low-frequency remotes from 27 MHz to 41 MHz.

1Control QZero has 4 buttons that can store 4 different remote controls, even from different brands.

1Control QZero is extremely easy to program; it features self-tuning and self-learning technology that works completely automatically, without the need to mount a quartz crystal.

Features

1Control WHY is able to replace all fixed-coded remote controls and the main rolling-code encodings, in the following frequency bands: from 433.0 MHz to 868.0 MHz, using the following modulations: AM and FM.

Available in two colors: white and black

Power Supply

Battery: 1 A23 battery

To replace the battery, open the QZero remote by gently lifting the front shell of the device with a small screwdriver.

The QZero remote retains the copied remotes even when the power is removed.

Other data

Dimensions: 60×37×15 mm

Weight (including battery): 32g

EAN code – white: 8056772851137

EAN code – black: 8056772851144

Operating distance

The maximum distance between the QZero remote and the automation to be controlled varies depending on the type of remote copied.

Typically, this distance ranges between 20 and 40 meters.

Package Contents
